Terms

1. All orders prepaid by credit card.
2. VISA, MasterCard, Discover and American Express are accepted.
3. After five orders customers may apply for credit terms.
4. All credit terms are Net 30 days upon approval.
5. All orders are subject to shipping and handling charges.
6. All prices are U.S. funds. Prices subject to change without notice.

Returns

1. Please contact our Materials Manager prior to the return of any goods to our office.
2. All returns must be authorized to assure proper credit to your account, as well as in resellable condition.
3. All returns are subject to a 25% restocking fee.
4. No returns past 30 days of invoicing.
5. All returns must be pre approved, no exceptions.

Damages

1. If your package(s) arrive damaged, note in writing the extent of damage on delivery bill i.e. carton(s) wet, crushed, torn, hole in carton, carton rattles, etc.
2. If damage is discovered after delivery:

- Retain all merchandise, cartons, and packing materials for inspection.
- Notify local office or carrier (UPS or motor freight) and request an inspection.
- This initial request may be verbal but must be confirmed in writing.

To place an order or if you have any questions on the above please contact our Customer Service Department.

Training and Education

PTC Training and Education systems are designed to fit a broad range of training needs and budgets. Our educational products include online courses, step-by-step manuals (TechBooks), Training modules with DVDs or flash drives, 3Shape Design, hands-on courses, and in lab training/consulting.

We believe establishing a solid foundation of anatomy fundamentals and common vocabulary is always the first step in successful training. While CAD/CAM is driving lab production for most labs, we have found that when problems arise, the knowledge gained in learning precise analong fundamentals is often the solution.

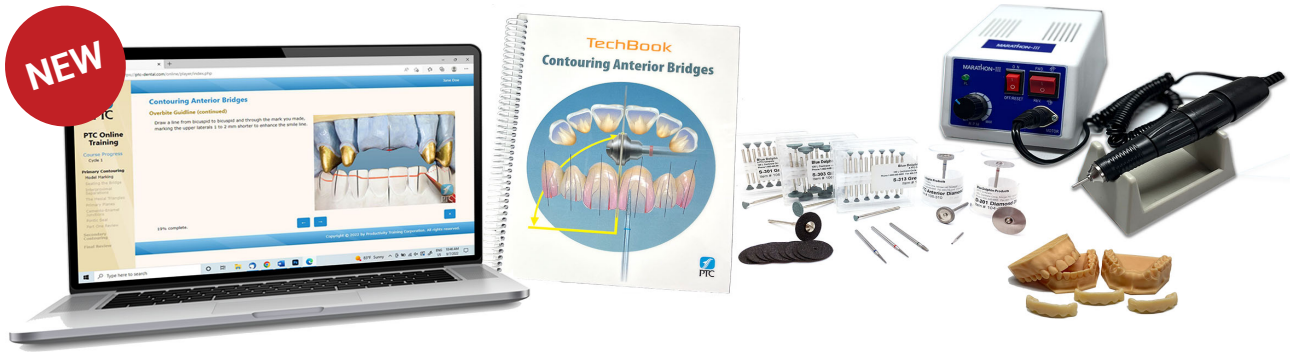
Online Courses

These fundamental courses are essential in establishing common vocabulary terms and standardizing dental anatomy features in the dental lab or office. The courses takes 3 - 15 hours depending on the student's prior knowledge and experience.

Courses Available:

Simplifying Posterior Dental Anatomy	Item#: SPAONLINE	$73.00
ADD ON: NEW!!! **Verification Workbook**	Item#: 205-1302	$40.00
Simplifying Anterior Anatomy	Item#: SAAONLINE	$53.00
The Science of a Natural Smile	Item#: SNSONLINE	$73.00
Oral Anatomy and Physiology	Item#: OAPONLINE	$73.00

Our Newest Online Course: Contouring Anterior Bridges

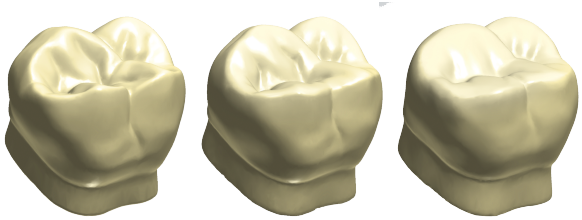


Contouring Anterior Bridges	Item#: CABONLINE $276.00
Contouring Anterior Bridges Plus	Item#: CABONLINESK $635.00
Includes: TechBook, Student Kit, Models & Bridges	

DIGITAL TRAINING

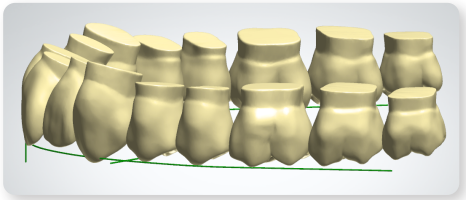
The PTC Triple A° Smile Libraries

With the PTC Triple A° smile libraries, it's simple and quick to pick the library that matches the wear of the patient's teeth. Instead of featureless shapes, restorations match the wear of the adjacent teeth while retaining the anatomical features of natural dentition.

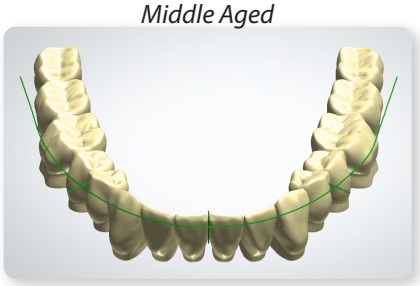


The Ness Teeth™

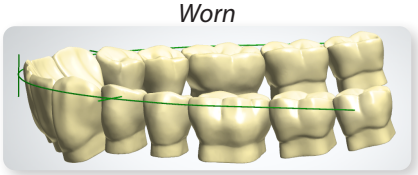
Youthful



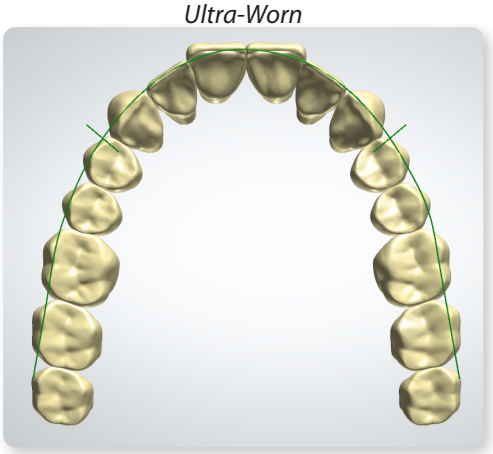
Middle Aged



Worn



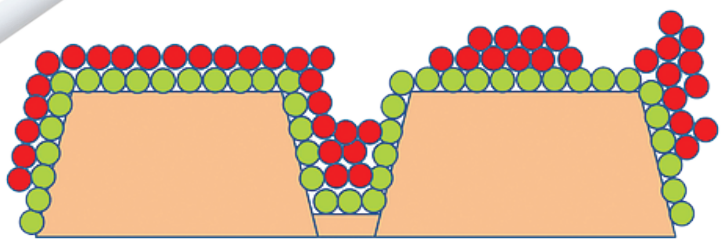
Ultra-Worn



PTC **Triple A° Smile Libraries** 5 libraries of anterior and posterior teeth in 5 stages of wear

Item#: PTC-AAA $520.00

Snow Scan Powder



Snow Scan Powder (green) leaves a perfectly even layer
Conventional spray (red) creates build up and uneven layers

Snow Scan Powder is a new alternative to scan spray for CAD/CAM. It is up to 12x more accurate with a 1µm coating, compared to spray's average coating of 12µm. Scan Powder yields over 3000 abutment scans per container, compared to just 50 scans per spray can. It leaves a perfectly even coating, has no dry wait time, and is easy to clean up. The ultra fine powder adheres to metal, wax, zirconia, stone, resin, and other shiny surfaces.

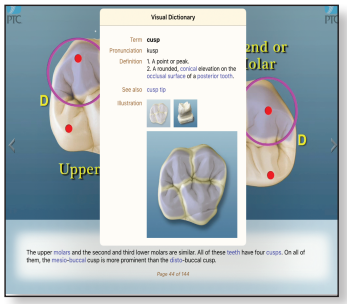
Item#: SP2101A $149.00

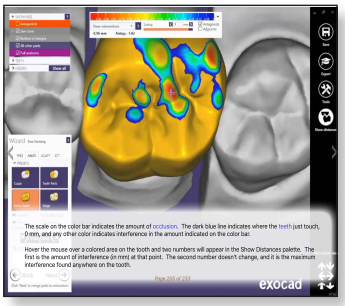
3Shape and exocad

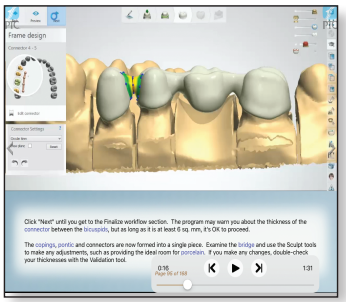
- More consistent results from different CAD designers
- Best way to teach CAD-savvy employees with no dental experience how to make designs that look like teeth
- The fastest way to teach experienced dental technicians in the new world of CAD design

The PTC Training app is the only comprehensive CAD training program available for training in your laboratory. Now you can train inexperienced, computer-savvy people as well as not-so-computer-savvy, experienced technicians to design consistent digital crowns and bridges.

The PTC training apps not only teach how to use 3Shape and Exocad, they also teach proper crown and bridge anatomy and occlusion.







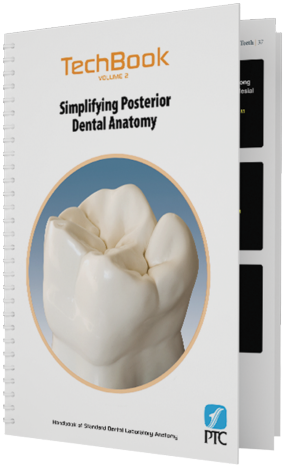
Download the ***free*** introductory app and receive the *Introduction to Computer Aided Design* course and our *Ness Visual Dictionary* of over 1500 illustrated dental terms ***absolutely free!*** Just search the Web for "PTC Training App". Available for Android and Apple.

PTC 3Shape Training 4 courses teach anatomy, 3Shape fundamentals, and posterior design. **Item#: 3SHAPE-CORE $1400.00**

PTC exocad Training 3 courses teach anatomy, exocad fundamentals, and posterior design. **Item#: EXOCAD-CORE $400.00**

(Receive exocad free with purchase of 3Shape)

TechBooks

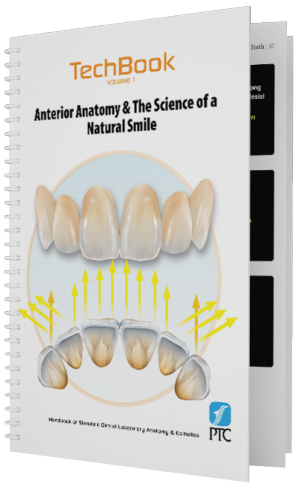


Simplifying Posterior Dental Anatomy

- Establish a stable anatomical reference and common vocabulary.
- The basis of all posterior restorations.
- A precise understanding of dental anatomy is the source of excellence in the dental laboratory.
- Essential to CAD/CAM design.

Languages Available:

English	Item#: 200-8000	$165.00
Spanish	Item#: 200-8001	$165.00
German	Item#: 200-8002	$165.00
Russian	Item#: 200-8003	$165.00
Turkish	Item#: 200-8004	$165.00

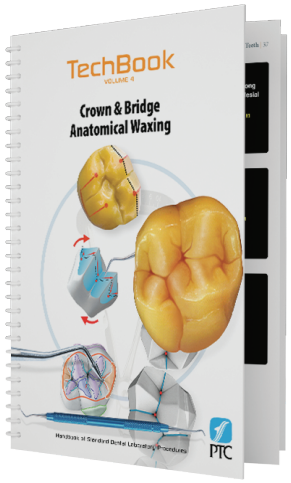


Anterior Anatomy and the Science of a Natural Smile

- Dramatically improve your ability to communicate clearly on the subject of esthetics.
- Learn the 10 essential components of natural smiles and understand how to use them to create customized smiles.
- Essential to all anterior restorations.

Languages Available:

English	Item#: 200-7000 $205.00
German	Item#: 200-7002 $205.00
Russian	Item#: 200-7003 $205.00
Turkish	Item#: 200-7004 $205.00



Crown and Bridge Anatomical Waxing

- Based on the anatomical concepts learned in Simplifying Posterior Dental Anatomy.
- Learn PTC's clear, fast, and efficient step-by-step procedures for waxing posterior teeth to full contour.
- See specific examples of what the finished product should look like at the completion of each step in wax.
- Each action is measured, eliminating guesswork.
- Streamline CAD/CAM design using these procedures.

Languages Available:

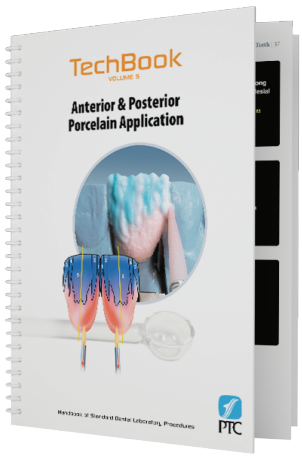
English	Item#: 200-3000 $165.00
Russian	Item#: 200-3003 $165.00
Turkish	Item#: 200-3004 $165.00

Framework Design and Fabrication

- Provides the essential information for framework design in wax, metal, and digital restorations.
- Proper framework design is the foundation for multiple unit restorations.

Languages Available:

English	Item#: 200-6000 $165.00
German	Item#: 200-6002 $165.00
Russian	Item#: 200-6003 $165.00
Turkish	Item#: 200-6004 $165.00

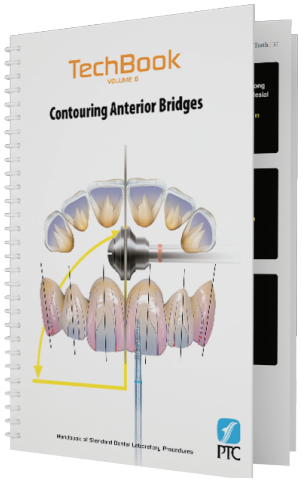


Anterior and Posterior Porcelain Application

- Learn a systematic method for opaquing and building both single-unit and multiple unit anterior and posterior crowns and bridges to increase productivity and quality.
- Understand the importance of controlling body/enamel differentiation, opacious dentin and internal staining to create natural, lifelike restorations.

Languages Available:

English	Item#:	200-1000	$205.00
German	Item#:	200-1002	$205.00
Russian	Item#:	200-1003	$205.00
Turkish	Item#:	200-1004	$205.00

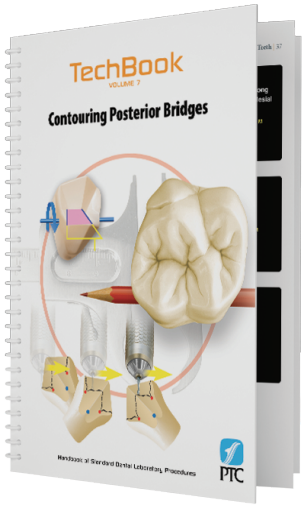


Contouring Anterior Bridges

- Utilize PTC's precise step-by-step procedures for creating anatomically correct and esthetically pleasing anterior restorations, time after time.
- Discover how aligning all of the anatomical features of anterior teeth with the long axis of the tooth is essential in creating natural looking restorations.
- These procedures are the fastest way to learn anterior contouring.
- Anterior Anatomy and the Science of a Natural Smile supports these concepts and procedures.

Languages Available:

English	Item#:	200-2000	$165.00
German	Item#:	200-2002	$165.00
Russian	Item#:	200-2003	$165.00
Turkish	Item#:	200-2004	$165.00

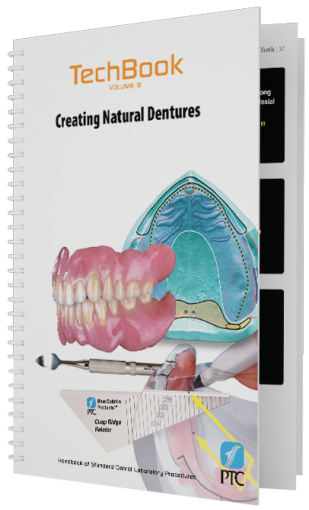


Contouring Posterior Bridges

- Learn a systematic procedure for contouring posterior bridges.
- Each action is predetermined by using model landmarks and measured markings.
- Using the knowledge learned in Simplifying Posterior Dental Anatomy, you will find contouring posterior crowns is easier then you ever imagined.
- Regardless of your experience, these procedures can increase your consistency and productivity.

Languages Available:

English	Item#:	200-4000	$165.00
Russian	Item#:	200-4003	$165.00
Turkish	Item#:	200-4004	$165.00



Creating Natural Dentures

- Learn the muscles, attachments, and anatomical features necessary to create a stable denture.
- Discover how simple measuring instruments can quickly provide accurate guidelines for technicians to follow when constructing natural, self-cleaning, premium dentures.
- Develop the ability to quickly set anterior and posterior teeth and make subtle adjustments for strong or soft esthetic compositions.

Languages Available:

English	Item#: 200-5000 $205.00
Russian	Item#: 200-5003 $205.00
Turkish	Item#: 200-5004 $205.00

TechMaster Learning Modules

PTC's TechMaster Video Learning Modules include an illustrated step-by-step manual with corresponding training DVD or Flash Drive that guides you through learning process by prompting you when to read the manual, watch the videos, study the learning drills and complete the written exercises.

Our exclusive TechMaster System makes it easy:

- Detailed step-by-step technical procedures
- Complete instructions on how to study the course
- Visual Learning Drills
- Written Exercises

NEW Flash Drive option!

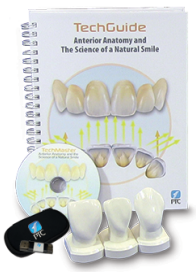
Simplifying Posterior Anatomy

Learning posterior anatomy has never been easier. This module is the foundation all dental technicians must have to build a rock solid career.

DVD Item#: 202-8000 $615.00
Flash Drive Item#: 202-8001 $615.00
ADD-ON: Set of 7 Posterior Ness Teeth
Item#: 205-3000 $273.00

Anterior Anatomy and the Science of a Natural Smile

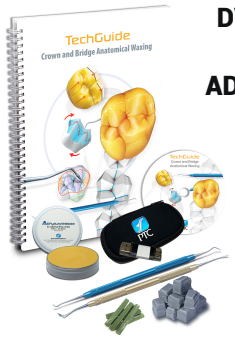
Covering anterior anatomy as you have never seen before, learn the 10 fundamental concepts that will take your anterior restorations to the next level.



DVD Item#: 202-7000 $690.00 **Flash Drive** Item#: 202-7001 $690.00
ADD-ON: Set of 3 Anterior Ness Teeth
Item#: 205-2000 $138.00

Crown Bridge and Anatomical Waxing

Condensed and simplified, learn exactly what to do to make anatomically correct, full contour waxups.



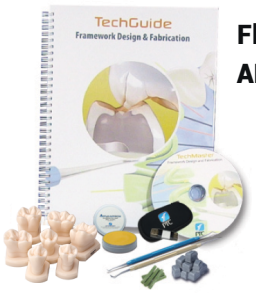
DVD Item#: 202-3000 $615.00 **Flash Drive** Item#: 202-3001 615.00

ADD-ON: Set of 7 Posterior Ness Teeth
Item#: 205-3000 $273.00

ADD-ON: Waxing Student Kit
Item#: 800-2022 $195.25

Framework Design and Fabrication

Covering skills from consistently perfect margins, pontic placement and design, maximizing connector strength, to designing frameworks to avoid multiple porcelain firings, this module sets the stage for the entire porcelain department.



DVD Item#: 202-6000 615.00
Flash Drive Item#: 202-6001 $615.00

ADD-ON: Set of 7 Posterior Ness Teeth
Item#: 205-3000 $273.00

ADD-ON: Waxing Student Kit
Item#: 800-2022 $195.25

Anterior and Posterior Porcelain Application

Learn step-by-step procedures to build porcelain singles and bridges.

DVD Item#: 202-1000 $1048.95 **Flash Drive** Item#: 202-1001 $1048.95

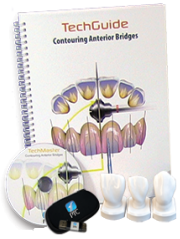
ADD-ON: Set of 7 Posterior Ness Teeth
Item#: 205-3000 $273.00

ADD-ON: Set of 3 Anterior Ness Teeth
Item#: 205-2000 $138.00

ADD-ON: Ceramic Building Student Kit
Item#: 800-2062 $195.05

Contouring Anterior Bridges

This module, paired with Anterior Anatomy and the Science of a Natural Smile takes the mystery out of anterior restoration.



DVD Item#: 202-2000 $615.00
Flash Drive Item#: 202-2001 $615.00

ADD-ON: Set of 3 Anterior Ness Teeth
Item#: 205-2000 $138.00

ADD-ON: Anterior Contouring Student Kit
Item#: 800-3042 $184.40

Contouring Posterior Bridges

Using model landmarks and measured markings, each contouring action is pre-determined, giving you an easy and most streamlined procedure for contouring beautiful posterior crowns and bridges.

DVD Item#: 202-4000 $615.00
Flash Drive Item#: 202-4001 $615.00

ADD-ON: Set of 7 Posterior Ness Teeth
Item#: 205-3000 $273.00

ADD-ON: Posterior Contouring Student Kit
Item#: 800-2012 $184.40

Creating Natural Dentures

One of our most comprehensive modules-teaching the skills and exact steps for producing self-cleaning, esthetic, natural looking dentures.

DVD Item#: 202-5000 $2033..00
Flash Drive Item#: 202-5001 $2033.00

ADD-ON: Denture Student Kit
Item#: 800-2025 $298.25

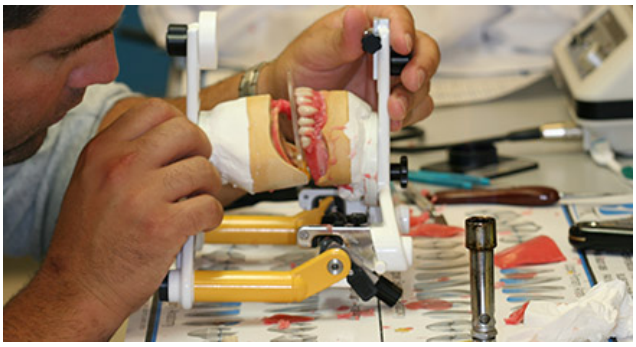
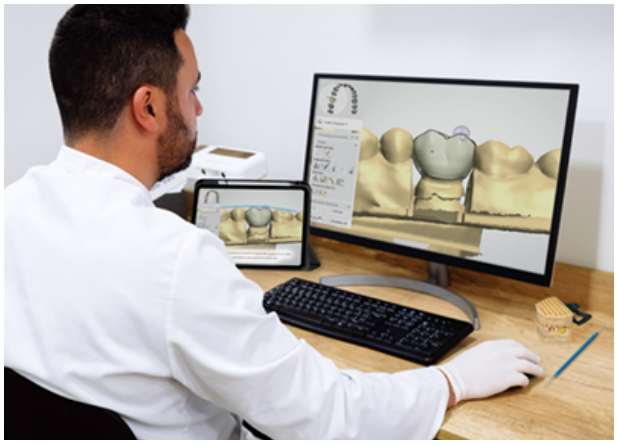
Hands-On Seminars

PTC offers four 3 and 1/2 day hands-on courses at our central California training center. Our courses are the fastest way to become proficient in laboratory discipline. Whether you want to learn a new skill to move up in your profession or you are an owner sending a technician to improve their skills, these courses are for you. All courses are approved for CDT credits.





Courses Available:

Crown and Bridge Anatomical Waxing and Framework Design	**Item#: WAXINGCOURSE $3000.00**
Anterior and Posterior Porcelain Application and Contouring	**Item#: PORCELAINCOURSE $3000.00**
Creating Natural Dentures	**Item#: DENTURECOURSE $3000.00**
NEW!!! Anatomical Waxing and 3Shape Design	**Item#:WAXCADCOURSE $3000.00**

On-Site Training

This is a very cost effective way to improve your laboratory's quality and production. Utilizing PTC's proven knowledge transfer techniques you can immediately increase the productivity of existing technicians and get new technicians producing quality work much faster. Our PTC trainer with 25+ years of experience will come to your lab and present a course or courses depending on the needs of your lab. Our courses are often combined or customized to meet specific production or quality requirements.

Courses Available:

Crown and Bridge Anatomical Waxing and Esthetic Framework Design

Porcelain Application and Contouring for Esthetic Control

Creating Natural Dentures

Simplifying Anterior and Posterior Anatomy

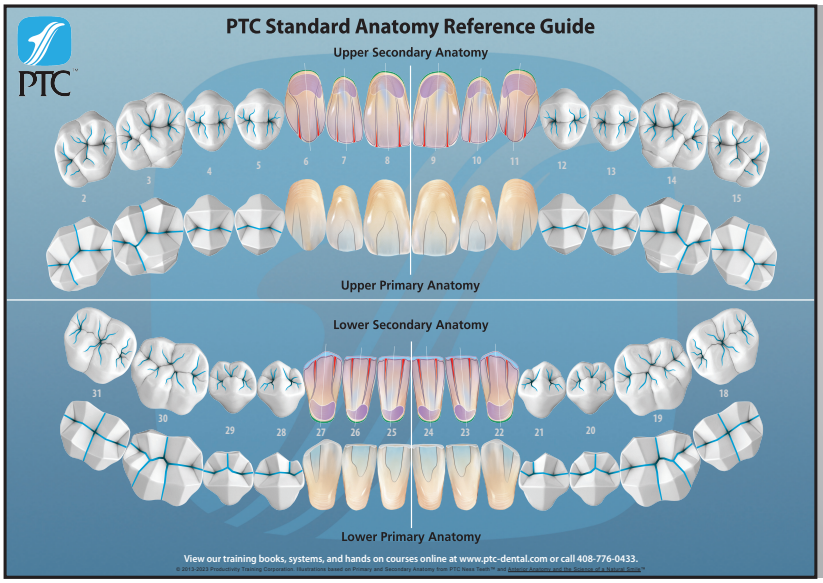
Technical Management

CAD Training for 3Shape and exocad

Call (408) 776-0433 for your personal consultation

Training Aids

Standard Anatomy Reference Guide



This 19” x 14.5” laminated reference guide illustrates primary and secondary anatomy of the upper and lower Ness Teeth™ with universal tooth numbers. The durable laminated guides can protect the workbench and serve as an excellent tool for teaching and communicating dental anatomy. Illustrating the 10 components of a natural smile, this guide is the perfect start for establishing an esthetic standard in your laboratory.

Item#: 203-2000 20.50

6+ 19.45

12+ 15.95

Student Kits

Our student kits include all the tools and instruments used in our TechMaster Video Learning Modules. Each kit has everything you need to standardize the learning process.

Available Student Kits:

Anterior Contouring Student Kit	Item#: 800-3042	$180.80
Posterior Contouring Student Kit	Item#: 800-2012	$184.40
Ceramic Building Student Kit	Item#: 800-2062	$195.05
Denture Student Kit	Item#: 800-2025	$298.25
Waxing Student Kit	Item#: 800-2022	$195.25

Tooth Study Models

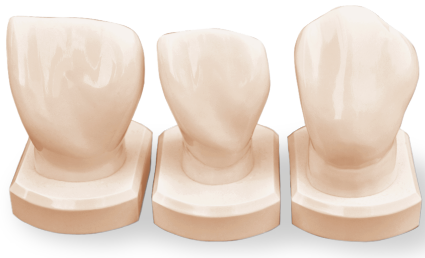
Posterior Ness Teeth™ Set of 7

These 7 posterior Ness Teeth are ten times the normal size of a tooth.

New light weight polymer material is virtually indestructible, resistant to markings, and will not discolor with age.

Item#: 205-3000 $273.00

Anterior Ness Teeth™ Set of 3



These 3 anterior Ness teeth are ten times the normal size of a tooth.

New light weight polymer material is virtually indestructible, resistant to markings, and will not discolor with age.

Item#: 205-2000 $138.00

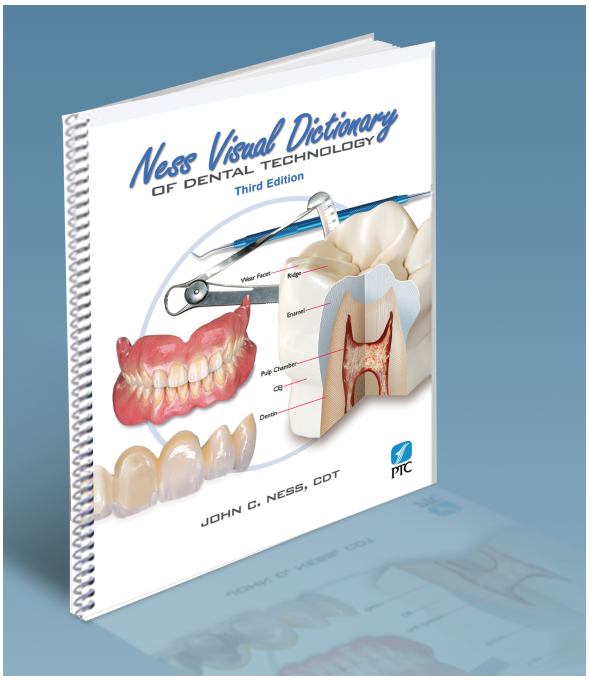
Ness Teeth™ Set of 20

Consists of a set of 20 three dimensional models that show the proper cusp and ridge positions in primary anatomy and the natural contours and grooves in secondary anatomy. Each tooth is ten times the normal size and is made of tough epoxy that can be marked on and wiped clean. The full set of Ness Teeth consists of: 4 molars and 3 bicuspids in primary anatomy, plus 4 molars, 3 bicuspids, 2 cuspids and 4 incisors in secondary anatomy.

Item#: 205-1000 $665.00

Visual Dictionary

The Ness Visual Dictionary opens the doors to better communication for every technician, lab and dental office. The answers are here. Put it on your desk now.



Ness Visual Dictionary OF DENTAL TECHNOLOGY

The spiral bound visual dictionary contains over 1,500 essential dental terms that everyone, from dental students to dental assistants to dental technicians, would need to look up at a glance. In addition to definitions, dental terms contain full-color illustrations and a reference section including pronunciation, variations of a term, and a cross-reference to related terms.

Item# 203-1000 $122.00

5+ $100.00

With over 1,500 illustrations, the Ness Visual Dictionary is an indispensable training tool and reference for every dental professional.

Online

The online dental dictionary is fully searchable, and contains links to other dental terms used in definition or reference. Users can quickly link from one related term to another for a thorough understanding of the subject. While the printed dictionary includes one image per term, each term in the online dictionary includes up to 6 images or illustrations.

3D Resins

VeriModel OS White

New VeriModel OS White 3D Print Resin provides the dental laboratory and office with a white colored multi-purpose model resin exhibiting a high quality surface finish and precision on DLP systems with 35nm or 405 nm light source.

This versitile material can be used for a wide variety of 3D printed applications, including the production of highly accurate orthodontic and presentation models. It can be used with silicone-based separators, vacuum formers and is robust enough to be used with a laser-welder. 3D Printed VeriModel OS materials provide the lab or dentist with all the advantages of 3D printed models, including reliable accuracy, fine detail, and clean, smooth surfaces.

Color: White **Item#: 71173 $175.00**

VeriModel OS Grey

The popular VeriModel OS 3D print resin is now available in grey. The methrylate-based resin was developed for dental models printed on most open-system DLP, LCD, and SLA printers with both 385nm and 405nm light sources.

Like the other VeriModel colors, it is highly accurate, stable, provides high detail resolution, low shrinkage and long-lasting thoroughness. Its popular grey color gives a visual contrast to waxes and features easy-to-clean, smooth matte surface finish.

Color: Grey 1kg(910ml) bottle **Item#: 71176 $175.00**

VeriModel OS Golden Brown

WhipMix introduces VeriModel OS Golden Brown, the latest addition to its VeriBuild print resin family. The methacrylate-based 3D print resin is made especially for dental models and removable dies. It is compatable with both 385nm and 405nm 3D printers and is ideal for most open-system DLP, LCD, and SLA printers.

VeriModel OS Golden Brown provides high detail resolution, sharp margins, low shrinkage and long-lasting toughness, with an additional attractive Golden Brown color that provides a visual contrast with light color die stones and makes seeing margin and anatomical detail easy. The new resin also features an easy-to-clean, smooth, matte surface.

Color: Golden Brown 1kg(910ml) bottle **Item#: 71172 $175.00**

VeriModel OS Ivory

WhipMix introduces the new version of VeriModel OS Ivory offering not only a high quality surface finish and extreme precision for models, but it can be used in any open-source 385nm or 405nm printer. It offers a wide variety of 3D printed applications, including the production of highly accurate working and presentation models for crown and bridge, prosthetics and orthodontic work.

Verimodel OS ivory 385/405 provides the lab and dentist with all of the advatages of previous generations, including reliable accuracy, fine detail, and a beautiful, natural ivory color.

Color: Ivory 1kg(910ml) bottle **Item#: 71177 $175.00**

VeriCast OS Red

VeriCast OS prints accurate and detailed crowns, bridges substructures, and RPD frameworks, is durable, and burns out cleanly. It's ideal for investment casting and ceramic pressing, and its red color makes it easy to see detail. For optimal results, use WhipMix ResinVest, which is a phosphate investment made specifically for burning out printed or milled resin patterns.

VeriCast OS resin works with LCD and DLP printers in both 385nm and 405nm wavelengths.

Color: Red 1kg(910ml) bottle **Item#: 71179 $325.00**

VeriSplint OS

WhipMix has developed a 3D printed resin that is a rigid and durable for dental splints. The additive manufacturing of splints provides a high level of efficiency by removing several lengthy steps and lowering the cost of materials. It also brings a greater degree of digital design flexibility into the process, which improves both the lab's and the patient's experience.

Available in 1kg(910ml) bottle **Item#: 71174 $420.00**

VeriGuide OS

VeriGuide OS, is a class I, CE certified resin material developed for the production of precision surgical guides for use in implant surgery. The resin features an easy post-processing method and produces highly accurate surgical guides with high quality surface.

Sleeves may be inserted directly after printing with excellent fit. The material can also be sterilized by autoclave, steam ethylene, oxide, or gamma rays without affecting dimentional stability, physical properties or biocompatibility.

Available in 1kg(910ml) bottle **Item#: 71175 $265.00**

Dental Office

Impression Trays

Transform Heat-Mouldable Impression Trays

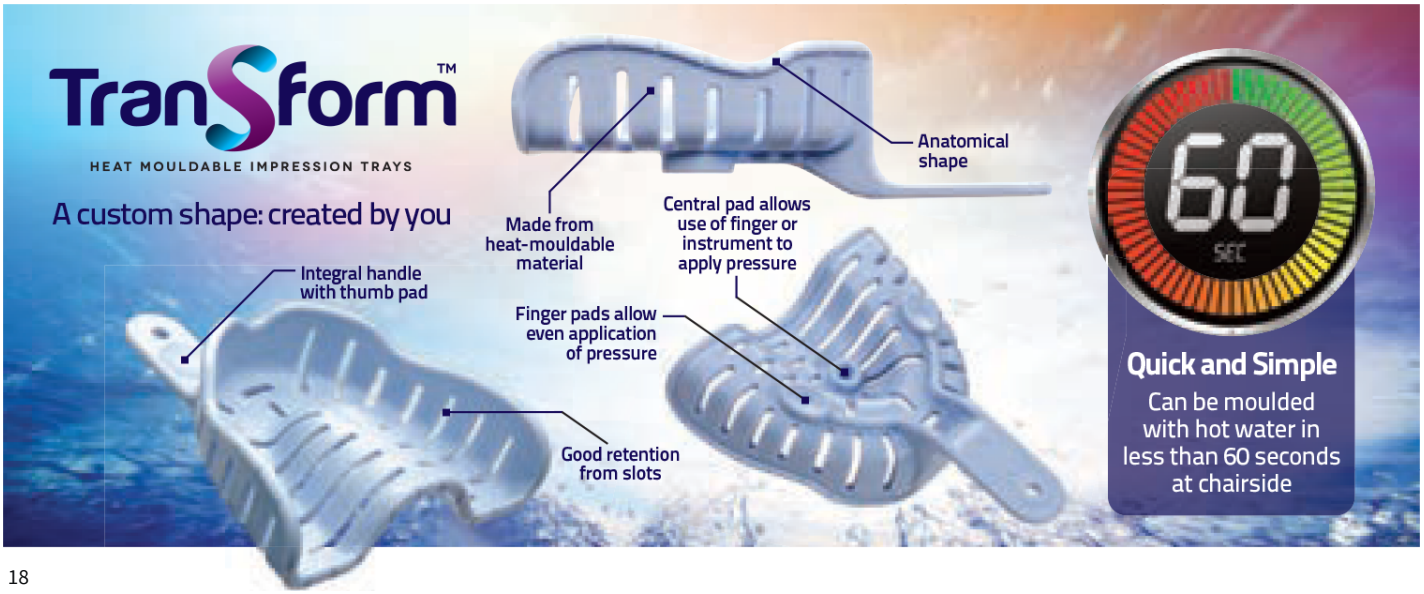
Three-heat-mouldable sizes and separate designs for dentate and edentulous patients require much less impression material, resulting in less shrinkage and superior fitting restorations.

Dentate (12 pcs per bag):

A- Large Lower	**Item#: 400-202 $13.95**
B- Large Lower	**Item#: 400-203 $13.95**
C- Medium Lower	**Item#: 400-204 $13.95**
D- Medium Upper	**Item#: 400-205 $13.95**
E- Small Lower	**Item#: 400-206 $13.95**
F- Small Upper	**Item#: 400-207 $13.95**

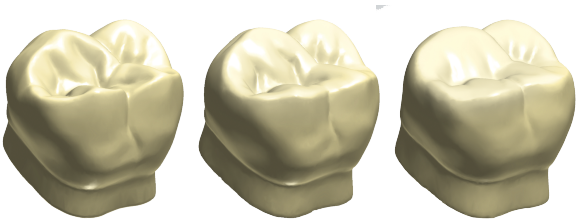
Edentulous (12 pcs per bag):

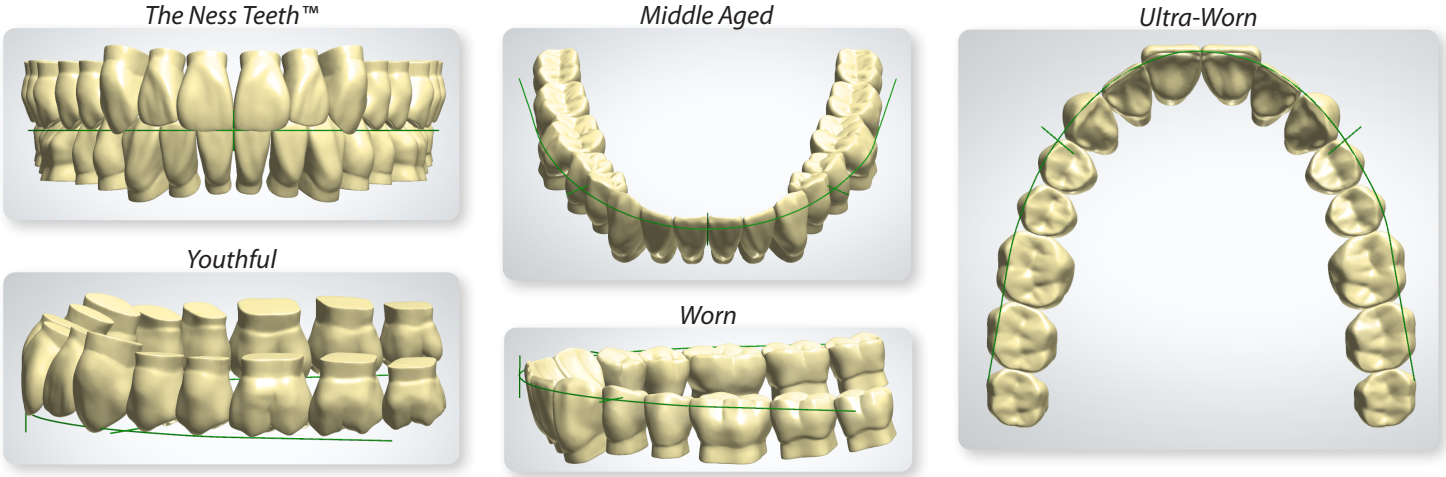
A- Large Lower	**Item#: 400-208 $13.95**
B- Large Lower	**Item#: 400-209 $13.95**
C- Medium Lower	**Item#: 400-210 $13.95**
D- Medium Upper	**Item#: 400-211 $13.95**
E- Small Lower	**Item#: 400-212 $13.95**
F- Small Upper	**Item#: 400-213 $13.95**



The PTC Triple A° Smile Libraries

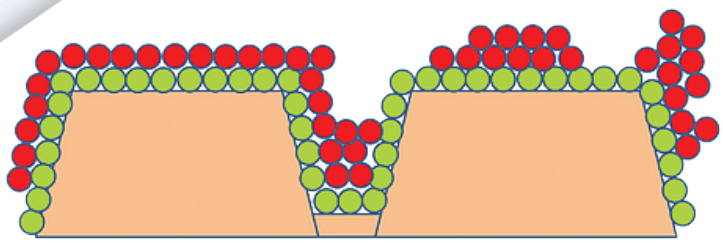
With the PTC Triple A° smile libraries, it's simple and quick to pick the library that best matches the wear of the patient's teeth. Instead of featureless shapes, restored teeth match the wear of the adjacent teeth while retaining all the anatomical features of natural dentition.





PTC **Triple A° Smile Libraries** 5 libraries of anterior and posterior teeth in 5 stages of wear **Item#: PTC-AAA $520.00**

Snow Scan Powder



Snow Scan Powder (green) leaves a perfectly even layer
Conventional spray (red) creates build up and uneven layers

Snow Scan Powder is a new alternative to scan spray for CAD/CAM. It is up to 12x more accurate with a 1µm coating, compared to spray's average coating of 12µm. Scan Powder yields over 3000 abutment scans per container, compared to just 50 scans per spray can. It leaves a perfectly even coating, has no dry wait time, and is easy to clean up. The ultra fine-powder adheres to metal, wax, zirconia, stone, resin, and other shiny surfaces.

Item#: SP2101A $149.00

Ball Bearing Bit Recorder Kit

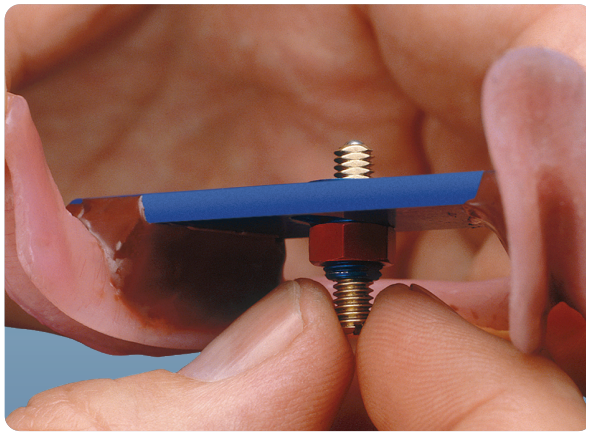
The Ball Bearing Bite Recorder Kit is a simple, effective means of obtaining Gothic Arch Tracing. The technique is simple and does not require a preliminary mounting. Therefore, one appointment is eliminated.

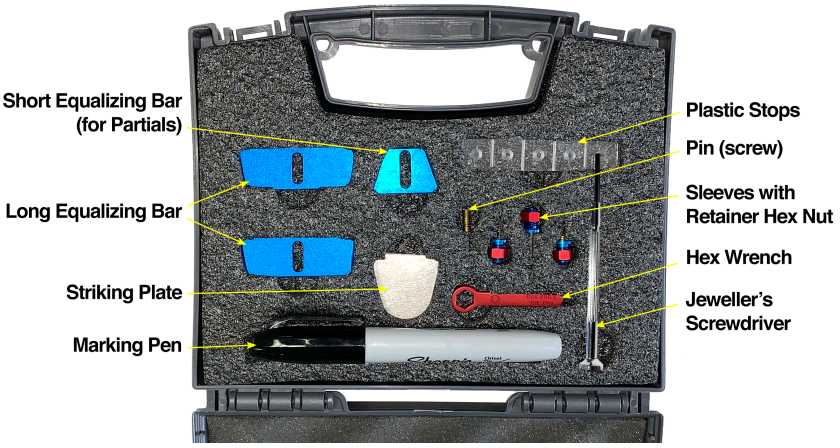
Being less bulky than other devices, the BBBR is easier to use and less stressful to the patient. Based on the “ball point pen” principle, the stylus can be incrementally adjusted in the mouth when obtaining vertical. The ball bearing glides smoothly over the tracing plate, leaving an accurate Gothic Arch Tracing.

Even the so-called “locked condyle” patients relax when they are made aware of the smooth rolling ball bearing pin.

Kit includes complete illustrated instruction manual.

Item# 313-100 $354.00

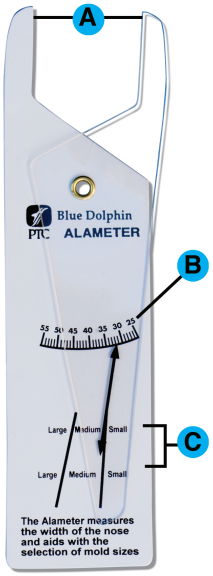




Ball Bearing Bite Recorder Kit Components

Long Bar Assembly Includes: Long Bar, Long Screw, Sleeve, Hex Retainer Nut	**Item#: 313-110 $83.77**
Short Bar Assembly Includes: Short Bar, Short Screw, Sleeve, Hex Retainer Nut	**Item#: 313-130 $76.13**
Long Bar	**Item#: 313-120 $29.63**
Short Bar	**Item#: 313-140 $26.67**
Sleeve	**Item#: 313-150 $14.75**
Hex Retainer Nut	**Item#: 313-160 $10.79**
Short Screw with Ball Bearing Head	**Item#: 313-190 $29.36**
Long Screw with Ball Bearing Head	**Item#: 313-180 $34.91**
Stops (Strip of 5)	**Item#: 313-200 $15.95**
Contoured Striking Plate	**Item#: 313-210 $16.59**
Hex Retainer Wrench	**Item#: 313-170 $20.55**
Marking Pen	**Item#: 313-220 $2.25**
Jeweler’s Screwdriver	**Item#: 313-230 $6.95**
Instruction Manual	**Item#: 313-260 $14.95**

Measuring Instruments



Alameter

The Alameter is used for selecting the correct size of tooth Molds for the patient. The instrument measures the widest part of the nose at the alae, indicating cuspid-to-cuspid distance (center of cuspid), as it was before edentation. Instructions are included.

Item#: 300-100 $11.60

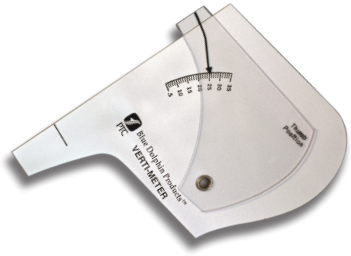
10+ $11.02

Papillameter

A measuring device used in the construction of upper wax rims (Esthetic Control Base). The papillameter measures the vertical distance between the alveolar ridge and the low lip line. A bite rim set at the ideal incisal length for the patient can save the dentist valuable chair time by minimizing adjustments. The papillameter is autoclavable and includes instructions.

Item#: 300-102 $16.50

10+ $15.67



Vertimeter

A convenient measuring instrument used to record vertical dimension and mandibular rest position. Instructions are included.

Item#: 300-103 $11.60

10+ $11.02

Model and Die

PTC Die Spacers

Fast drying die spacer. Resistant to all die lubricants. Provides a very hard smooth surface. (20ml bottle)

Gold Die Spacer **Item#: 600-106 $21.59** Sale: $11.99

Silver Die Spacer **Item#: 600-107 $21.59** Sale: $11.99

Die Spacer Thinner **Item#: 600-105 $21.59** Sale: $11.99

PTC Die Spacer Kit:

Includes: 20ml Silver or Gold Die Spacer and Silver-Thin

Gold Kit **Item#: 600-109G $37.99** Sale: $23.98

Silver Kit **Item#: 600-109S $37.99** Sale: $23.98

Crown & Bridge and Denture Molds

Denture Molds

Practice molds for denture training. Made of durable silicone material, they can be repoured indefinitely without tearing or distortion.

Male Upper and Lower Set **Item#: 205-9110 $150.50**

Female Upper and Lower Set **Item#: 205-9120 $150.50**

Mounting jigs fit male or female molds and include occlusal plane and midline marks for accurate positioning on articulator.

Male Mounting Jig **Item#: 205-9113 $32.40**

Female Mounting Jig **Item#: 205-9123 $32.40**

Crown and Bridge Molds

Practice molds for crown and bridge training. Made of durable silicone material, they can be repoured indefinitely without tearing or distortion.

Includes upper and lower full models, four (4) prepped models consisting of 6-unit upper anterior bridge, 4-unit upper posterior bridge, 4-unit lower posterior bridge and upper bicuspid and first molar.

Models are sold as a full set only.

Item#: 220-0000 $458.50

ADVANTECH™

GET THE ADVANTAGE OF ADVANTECH!

Advantech Die Lubricant (1oz)

Developed using advanced micro-film technology, Advantech Die Lubricant offers a non-oily, clean and residue free release of dipped wax copings or hand applied wax without pattern distortion. Permits close adaption to the die for greater accuracy of the casting. Use on all materials where wax separation is required, including stone, epoxy, polyurethane, and metal.

Item# 601-100 $22.50

Advantech Die Spacers (1oz)

Exhibiting smooth feel and flow, the Advantech series of fast drying die spacers and sealers are characterized by superb thixotropic consistency, uniform homogeneous layer thickness, outstanding resistance against pressurized steam, scratching and chipping. Fast 15-second set time between coats.

Gold Die Spacer	**Item#: 601-102 $22.50**
Silver Die Spacer	**Item#: 601-103 $22.50**
Die Spacer Thinner	**Item#: 601-101 $22.50**

Advantech Die Sealer (1oz)

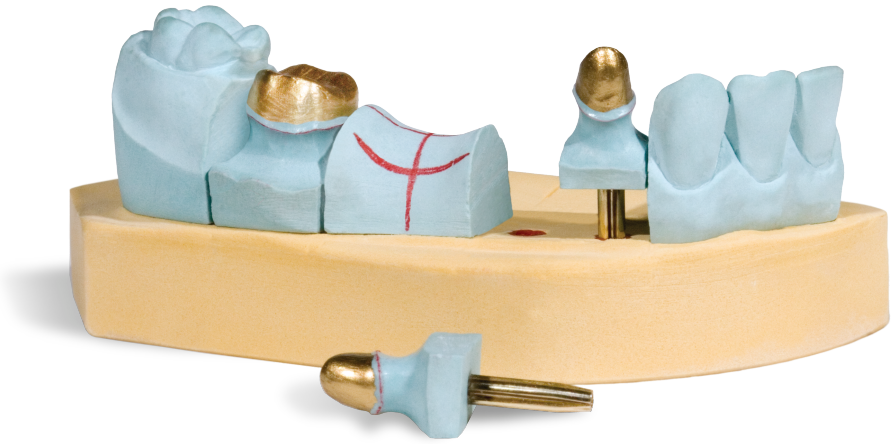
A paint on acrylic resin for sealing and hardening stone dies and models. Water proofs and seals stone surface without layer build-up on the die. Protects margins and reduces abrasion. Individual consistency controlled by using Advantech Thinner.

Die Sealer	**Item#: 601-104 $22.50**
Die Sealer Thinner	**Item#: 601-105 $22.50**

crosspin®

Die Pinning System

The crosspin system consists of a unique dowel pin and sleeve design, low profile model former and matching drill bit. Crosspins are precisely engineered for simplicity, stability and ease of use. The low-profile model can save 32% in base stone material cost while the single pin design speeds production.



Precisely engineered for stability and ease of use.

Cross Pin Features

Mix and Match Sizes

Four combinations of pins and sleeves adapt to individual preference.

Straight Pin and Sleeve

Does not trap debris like tapered pins.

Single Pin System

Ideal for anterior use. Reduces production time and material costs by using fewer pins.

Unique “+” Profile

Extremely stable, prevents rotation, and maintains stability when raising the die is required.

Matching Drill Bits

Fully compatible with Pindex drill

Crosspin Refills

Pins with sleeves (1000 each):

Long pins with long sleeves	**Item#: 500-150**
Short pins with short sleeves	**Item#: 500-110**
Long pins with short sleeves	**Item#: 500-170**
Short pins with long sleeves	**Item#: 500-171**

$185.00per bag of 1000

10+ $175.75

Only pins or sleeves (1000 count):

Long pins only	**Item#: 500-160 $129.50**
Short pins only	**Item#: 500-175 $129.50**
Long sleeves only	**Item#: 500-165 $55.50**
Short sleeves only	**Item#: 500-180 $55.50**

Starter Kits

Our starter kits come complete with everything you need to test the precision, stability and retention of Crosspins.

Crosspin Into Short Kit

Includes: 200 Short pins and sleeves, 1 drill bit, 2 Quadrant Model Formers & 1 Full Model Former

Item#: 500-100 $68.80

Crosspin Into Short & Long Kit

Includes: 100 Short pins and sleeves, 100 Long pins and sleeves, 1 drill bit, 2 Quadrant Model Formers & 1 Full Model Former

Item#: 500-101 $68.80

Crosspin Accessories

Drill Bit

Fully compatable with Pindex Drill

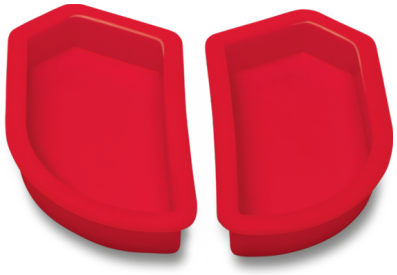
Item#: 500-130 $55.00

Model Former

Six Full Arch Formers for use with Short Pins only.

Item#: 500-140 $38.60

Sale: $22.95



Model Former

Twelve Quadrant Formers for use with Short Pins only.

Item#: 500-145 $38.60

Sale: $22.95

Crown and Bridge

Waxing Instruments

WC-1™ Waxing Instrument

The 1.5mm discoid end is ideal for carving perfect margins and interproximal areas on wax frameworks. The 1/2 Hollenback end is designed for carving full anatomical crowns and all other carving procedures

Item#: 105-101 $48.50 6+ $46.07

WC-2™ Waxing Instrument

The cone shaped end can be used to smooth the dissectional, secondary and auxillary grooves in occlusal surfaces of full crowns. It's perfect for shaping interdental papillae and gingival contours on full denture waxups. The opposing end is a spatula used for carrying molten wax.

Item#: 105-102 $48.506+ $46.07

Waxing Instrument Set

Includes 1 WC-1 and 1 WC-2

Item#: 105-100 $92.15

White Lightning Polishing Compound

Europe's best selling compound, White Lightning's creamy consistency enables it to cling to the material, resulting in a faster, more effective polish. Perfect for polishing both precious and non precious metals as well as acrylic and composites. (300 grams)

Item# 401-100 $35.90

Crown & Bridge Mold

Crown and Bridge Molds

Practice molds for crown and bridge training. Made of durable silicone material, they can be repoured indefinitely without tearing or distortion.

Includes upper and lower full models, four (4) prepped models consisting of 6-unit upper anterior bridge, 4-unit upper posterior bridge, 4-unit lower posterior bridge and upper bicuspid and first molar.

Models are sold as a full set only.

Item#: 220-0000 $458.50

Radar™ Articulating Paper

At only 40 microns thick, this thin Swiss-made paper ensures highly precise bite markings on all materials, wet or dry. Radar Articulating Paper gives dentists and lab techs the precision of film and foil with the ease-of-handling of thicker papers. Red and blue sides may be used alternately to check the same arch.

Horseshoe (6 Bundles) **Item#: 800-105 $17.45**

Sale: $14.47

Curved (12 Bundles) **Item#: 800-106 $15.49**

Sale: $12.20

BDP Articulating Paper

Double sided red/blue 65 micron Articulating Paper is used for accurate discrimination between occlusal contacts. The horseshoe shape provides simultaneous bilateral markings to disclose traumatic prematurities of up to .010".

Item# 800-104 $4.60

10+ $4.37

SmartBox Crown Boxes

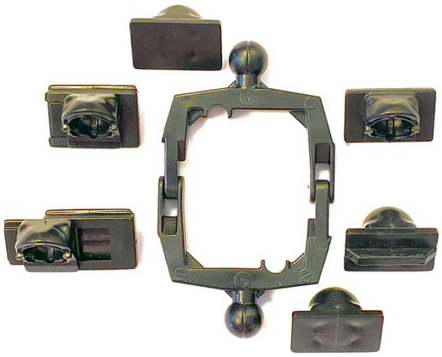
These affordable plastic boxes with foam inserts are perfect for dental crown and bridge.

- Modern, high functional design
- Clear, see through window
- Secure lid closure and crown holding
- Highly reusable, cost-effective

The SmartBox Crown Boxes come in two different colors and sizes: (Cannot be mixed and matched)

50 Large Blue Boxes	**Item#: SB2023 $18.50**
50 Large Transparent Boxes	**Item#: SB2022 $18.50**
100 Small Blue Boxes	**Item#: SB2013 $18.50**
100 Small Transparent Boxes	**Item#: SB2012 $18.50**

Articulators



Crown & Bridge Articulator

This lightweight articulator is easy to handle. Large enough for full dentures.

Item#: 305-315 $36.00

SmarTex Articulators

The SmarTex articulators offer full range of lateral and protrusive motions while providing accurate centric occlusion.

- Light weight
- Heavy duty
- Glue control structure to prevent unwanted disengagement
- Fast to assemble and easy to use

Available In:

Flat (100 pcs)	**Item#: SA2031 $22.00**
Slotted (100 pcs)	**Item#: SA2021 $22.00**
3D/Separable (100 pcs)	**Item#: SA2011 $24.00**

Dipping Wax

Perfect Margin Dipping Wax

This durable wax is highly plasticized and adapts perfectly to the die to create an even coat of wax that is semi-transparent so you can easily see the margin. This wax has a high melting point that prevents distortion during the application of carving wax and can be burnished easily without tearing or thinning at the margin. No additional margin wax is needed.

Available in grey only.

6oz Bag	**Item#: 700-100 $51.45**
12oz Bag	**Item#: 700-101 $77.86**

Contains everything you need to create perfect margins.

Kit includes:

- Perfect Margin Dipping Wax (6oz)
- Die Lube (30ml)
- Die Sealer (30ml)
- Gold or Silver Die Spacer (20ml)
- WC-1 Waxing Instrument
- PTC Perfect Margin Procedure

Item#: 700-102 $14.00

Perfect Margin Kit

Advantech Waxes

Advantech Sculpturing Wax

Hard, but not brittle, this wax carves smoothly and evenly. Because of its unique properties, technicians can carve primary and secondary anatomy with no distortion or wax break-up. As a result, full cast crowns can have the same anatomical features as porcelain to metal crowns. The pleasing yellow color makes critical contour angles and fine secondary anatomy easily visible.

Advantech Sculpturing Wax is ash free and burns out cleanly (60g)

Item#: 700-111 $39.79

Advantech Diagnostic Waxes

A mounted Diagnostic Wax-up is a critical roadmap to planning a realistic result.

These waxes give crown and bridge waxers and ceramists the tools needed to create realistic diagnostic wax-ups that help doctors increase the approval rate and patient satisfaction for their intended treatments.

Easily carvable with comparable characteristics of our carving waxes allow for clean, sharp carving and effortless polishing to a smooth high sheen.

(A) (B) (C) (D) White

Shades Available:

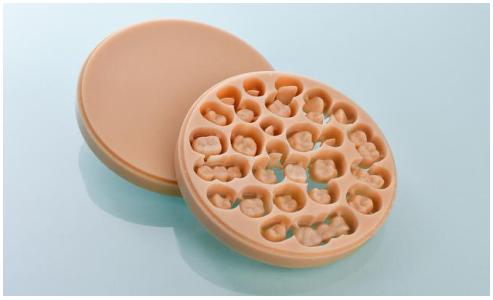
AdvanTech Diagnostic Wax Shade A (60g)	**Item#: 700-106 $39.79**
AdvanTech Diagnostic Wax Shade B (60g)	**Item#: 700-107 $39.79**
AdvanTech Diagnostic Wax Shade C (60g)	**Item#: 700-108 $39.79**
AdvanTech Diagnostic Wax Shade D (60g)	**Item#: 700-109 $39.79**
AdvanTech Diagnostic Wax White (60g)	**Item#: 700-110 $39.79**

Aesthetic Press Wax Blanks

Vanilla Speed Wax Blank (20,000 RPM)

This new formula of wax enables the same easy modification as our original Vanilla Blank with fast, accurate milling capability.

98 x 12mm	**Item#: 49580 $26.38**
98 x 14mm	**Item#: 49581 $26.38**
98 x 16mm	**Item#: 49582 $26.38**
98 x 18mm	**Item#: 49583 $26.38**
98 x 20mm	**Item#: 49584 $26.38**
98 x 25mm	**Item#: 49585 $26.38**
98 x 30mm	**Item#: 49586 $26.38**



For a fast mill you can work with, try our new 20,000 RPM Vanilla Speed!

Porcelain

Synthetic Porcelain Brushes

Cusp/Lobe Application Brush

Used for general porcelain application on single units and small bridges.

Item#: 104-111 $11.77

6+ $11.18

Rapid Building Brush

Provides proper moisture for building multiple unit cases. Synthetic materials provide a firm tip for sculpting.

Item#: 104-112 $11.77

6+ $11.18

Internal Effects Brush

Used to apply internal modifiers, stains, and glaze.

Item#: 104-114 $11.47

6+ $10.90

External Effects Brush

This brush is used for fine line characterization and general staining.

Item#: 104-115 $11.47

6+ $10.90

Primary Plane Brush

This stiff brush is used to contour and shape soft porcelain on anterior and posterior buildups.

Item#: 104-117 $13.32

6+ $12.65

Finishing Brush

Used for final smoothing and condensing of wet porcelain.

Item#: 104-116 $14.48

6+ $13.76

Model Duster

Used for general model clean up and smoothing full contour wax-up.

Item#: 104-113 $11.77

6+ $11.18

Synthetic Porcelain Brush Set

Contains one of each of the seven synthetic porcelain brushes. Great for trying out new brushes for the technician that is looking for the perfect brush.

Item#: 104-118 $77.44

Porcelain Instruments

#3 Carver

Designed for carving anatomy on all surfaces, works extremely well when carving the lingual surface of anterior teeth. Also is a vital tool for carving precise depressions in porcelain for application of modifiers.

Item#: 104-103 $27.59

6+ 26.20

Characterizer/Explorer

Two in one tool used for the creation of crack lines and other subtle internal enamel features in soft porcelain. The curved end is used for carving secondary anatomy and very fine depressions for internal color effects. Useful for carving fine dental in wax.

Item#: 104-104 $33.16

6+ 31.50

Probe

The tip is marked with three grooves: 1mm, 2mm, and 3mm for measuring the thickness of porcelain. Saves time and enhances esthetics as it ensures a more accurate build-up.

Item#: 104-105 $27.59

6+ 26.20

Slicer

The ultra thin stainless steel blade is used for fast contouring of body and enamel build up.

Item#: 104-106 $27.59

6+ 26.20

Porcelain Instrument Set

Contains one of each of the porcelain instruments.

Item# 104-100 $107.80

Abrasives, Diamonds, Wheels, Discs, Points, & Greenstones

PTC Anterior Diamond Wheel

This wheel has slightly rounded edges designed to create softened contours on labial surfaces of anterior teeth. The diamond surface prevents chipping of delicate incisal edges.

Item#: 106-310 $27.70

6+ 26.31

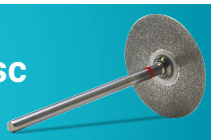
PTC Posterior Diamond Wheel

This wheel is slightly more aggressive than the anterior wheel. The square edge allows consistent, predicatable contouring of posterior contours and contacts.

Item#: 106-320 $27.70

6+ 26.31

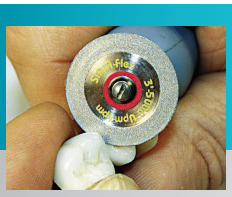
D-201 Diamond Disc



This 0.2mm flexible disc can be used for cutting and shaping porcelain interproximals. It is stiff enough to resist permanent distortion with use, yet flexible enough to soften the interproximal line angles, which create a natural-looking effect in porcelain work. Diamond layer on one side only.

Item#: 104-400 $16.49

6+ 15.67



SIDIA Sintered Diamond Disc

This extremely long lasting and high quality sintered diamond disc is only 0.15mm thick, yet rigid enough to define the interproximal separations without bending or distorting. The disc features a 3mm pure sintered diamond edge that prevents black lines.

Item#: 106-300 $59.49

6+ 56.50

T-101 Tapered Diamond

Used specifically to blend the contoured areas of anterior and posterior crowns and bridges. The medium grit diamond quickly blends rough contoured areas of porcelain with very little effort. The fine grit T-101 is ideal for texturing all contoured surfaces.

Med T-101(Blue Band) **Item#: 106-110 $10.05**

6+ 9.55

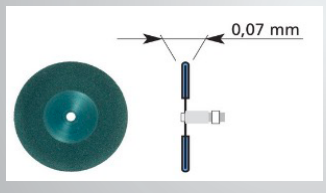
Fine T-101(Red Band) **Item#: 106-115 $10.05**

6+ 9.55

Ultra-Thin Diamond Disc

Ultra-thin diamond disc for precision contouring of interproximal and incisal embrasures.

Item#: 104-401 $22.05

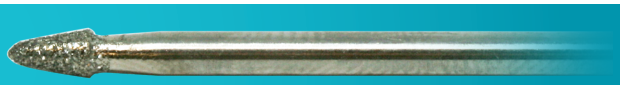


Speedy Separating Disc

These aggressive discs can be used on metal or porcelain. They are most useful as cut off discs as well as interproximal reduction of porcelain bridges. (Box of 100)

Item#: 106-170 $38.45

Paraboidal Cingulum Refiner



This small cone shaped diamond is ideal for quickly enhancing the cingulum and lingual concavity of anteriors.

Paraboidal Cingulum Refiner (Medium) **Item#: 106-105 $10.25**

Paraboidal Cingulum Refiner (Fine) **Item#: 106-100 $10.25**

Cylindrical Fossae Enhancer

The barrel diamond shape is perfect for refining occlusal primary planes on posterior teeth.

Cylindrical Fossae Enhancer (Medium) **Item#: 106-120 $10.15** 6+ $9.45

Cylindrical Fossae Enhancer (Fine) **Item#: 106-125 $10.15** 6+ $9.45

FG Carbide Burs

#37 Carbide Burs can be used for occlusal carving of developmental grooves on ceramic resorations.

Pack of 10 **Item#: 106-150 $15.30**

#35 Carbide Burs used for more delicate ceramic carving such as secondary grooves and crack lines.

Pack of 10 **Item#: 106-151 $15.30**

Greenstones

Designed to easily produce the anatomical contours and delicate surface textures that duplicate the features of natural teeth. Our Master Series Greenstones enable you to contour your work rapidly and efficiently while still leaving a smooth surface. (Sold in boxes of 12)

S-301/IC-5 Large Inverted Cone

Cusp contouring, general occlusal anatomy, imbrication lines, lingual areas. Can be used for small areas and anatomical features.

Item#: 106-131 $19.89 6+ $18.90

S-303/IC-5 WH-6 Large Square Edge Wheel

General use and bulk reduction, incisal 1/3 facets. Used to create labial, buccal and lingual contours of crowns and bridges.

Item#: 106-133 $19.89 6+ $18.90

S-305/IC-7 Large Inverted Cup

Cusp contouring, contact points, bulk contouring of posterior primary anatomy.

Item#: 106-135 $19.89 6+ $18.90

S-313/IC-3 Small Inverted Cone

Occlusal anatomy, creating striations, and imbrication lines. 3mm in diameter.

Item#: 106-143 $19.89 6+ $18.90

S-317/WH-4 Small Square Edge Wheel

Overall shaping and grinding, developmental groove areas and incisal edge facets.

Item#: 106-147 $19.89 6+ $18.90

View all our Greenstones at www.bluedolphindental.com

Oscar Diamond Polishing Paste

The economical polishing paste for a perfect, soft luster on Zirconia, composite and metal! (30g)

Item#: 49100 $80.80

Margin Stain

The Margin Stain is one of the most useful stains with a more opacious color, transparent porcelain margins can be covered when using the Pressed to Metal technique. Margin Stain can mimic mamelon effects on anterior restorations.

Item#: 48060 $51.95

Glaze Paste

The glaze paste is a low fusing material used to glaze veneers or porcelain inlays. This glaze paste leads to great results applied in thin layers, a preheat temperature of 450°C (842°F) and a 6 minute dry time.

Item#: 48050 $51.95

Press & Stain Ingots

For the press & stain technique, the technique can achieve the entire color spectrum with 3 different value based ingots. With one stain cycle, light colors as well as the dark shades can be matched without the use of glaze paste. The silicate-reinforced porcelain ensures a higher strength.

Dentures

MegaTray Upper (Box of 50)

MegaTray light curing wafers for custom impression trays and esthetic control baseplates. Easily form to models to produce precise-fitting base plates case-after-case. Also use to create fast and easy custom trays. It cures fast and strong with minimal shrinkage.

Item#: 400-100

$79.89

Mega-I Separator

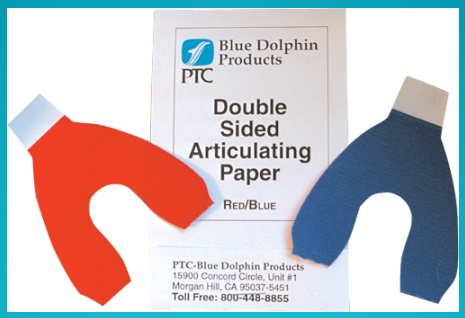
Alginate separator is used to insulate parts of plaster forms, for denture processing and orthodontics. (500ml)

Item#: 400-102 $22.10

Mega-Glanz

Liquid polishing agent for high shine on both resins and metals. Use with brush or cloth wheel. (500ml)

Item#: 400-103 $28.10



BDP Articulating Paper

Double sided red/blue 65 micron Articulating Paper is used for accurate discrimination between occlusal contacts. The horseshoe shape provides simultaneous bilateral markings to disclose traumatic prematurities of up to .010".

Item# 800-104 $4.35

6+ $4.05

Denture Articulator

This lightweight articulator is easy to handle and can easily accommodate full dentures.

Item#: 305-315 $34.95

Denture Molds

Practice molds for denture training. Made of durable silicone material, they can be repoured indefinitely without tearing or distortion.

Male Upper and Lower Set — Item#: 205-9110 $139.00

Female Upper and Lower Set — Item#: 205-9120 $139.00

Mounting jigs fit male or female molds and include occlusal plane and midline marks for accurate positioning on articulator.

Male Mounting Jig — Item#: 205-9113 $29.95

Female Mounting Jig — Item#: 205-9123 $29.95

Denture Instruments

Rim Former

The rim former is specially designed for reducing bite rims and the Esthetic Control Base. Its unique feature is a raised ledge which fits into the hamular notches of the upper cast. It accurately levels the wax horizontally as the rim is reduced to the incisal edge line. Instructions for use included.

Item#: 305-210 $49.95 6+ 47.45

Ness Matrix Waxer

This double ended instrument has a heat reservoir on one end that quickly forms natural looking interdental papillae. The other end is a sharp concave spoon for precision carving.

Item#: 102-101 $72.05

Wax Knife

This multi-purpose knife is designed for carrying, softening and cutting wax when setting anterior teeth. The knife end is used to adjust tooth placement.

Item#: 102-102 $28.10

#7 Wax Spatula

This is a double ended spatula. One end is used for the “teardrop” interdental waxing of teeth and the other end is used for carrying large amounts of wax.

Item#: 102-103 $26.19

G.C. Post Dam Carver

Every denture technician has an instrument they have modified in some way to carve a post dam on a working denture cast. We have combined the best qualities of all the modified instruments we have seen into one high quality instrument.

The tempered carving head of the instrument is designed to carve both the 2mm post dam bead at the vibrating line and to feather the cast in the customary butterfly shape. The large handle provides a comfortable grip and enables the technician to easily apply the pressure needed to carve the model. The carving head is gently curved to provide the optimum carving angle.

Item#: 102-104 $42.40

5.5oz Item#: 305-604 $22.95

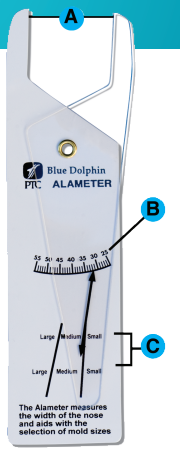
Denture Measuring Instruments

Papillameter

A measuring device used in the construction of upper wax rims (Esthetic Control Base). The papillameter measures the vertical distance between the alveolar ridge and the low lip line. A bite rim set at the ideal incisal length for the patient can save the dentist valuable chair time by minimizing adjustments. The papillameter is autoclavable and includes instructions.

Item#: 300-102 $14.90 10+ $13.86

Alameter



The Alameter is used for selecting the correct size of tooth Molds for the patient. The instrument measures the widest part of the nose at the alae, indicating cuspid-to-cuspid distance (center of cuspid), as it was before edentation. Instructions are included.

Item#: 300-100 $10.45

10+ $9.72

Alma Gauge

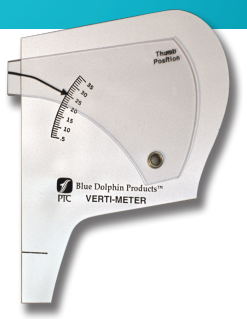
Using the Alma Gauge, dentists can measure and record the length and labial position of the anterior teeth as well as posterior tooth position on an existing denture. A clear plastic overlay is used to record the measurements and sent to the lab with the case. The laboratory technician can use the Alma Gauge to duplicate the exact measurements when constructing the Esthetic Control Base or relining the denture.

Item#: 300-106 $89.90

Fifty (50) Sleeves with pen and instructions

Item# 300-107 $25.79

Vertimeter



A convenient measuring instrument used to record vertical dimension and mandibular rest position. Instructions are included.

Item#: 300-103 $10.45

10+ $9.72

Cusp Ridge Relator

A device for transferring the position of the lower edentulous ridge crest to the occlusal setup plate.

Item#: 314-130 $10.95

Bow Compass

Item#: 300-104 $13.29 10+ 12.36

Item#: 300-109 $4.35

Occlusion Control Kit

The Occlusion Control Kit is designed to aid in establishing the occlusal plane and setting the teeth for upper denture setups. Use the Cusp Ridge Relator to transfer the lower ridge to the set up plate. Use the Mould Mate to select anterior teeth molds by determining the width of the upper 6 anterior teeth. Complete instructions included.

Item#: 314-100 $33.45

Ball Bearing Bit Recorder Kit

The Intraoral Arch Tracer Ball Bearing Bite Recorder Kit is a simple, effective means of obtaining Gothic Arch Tracing. The technique does not require a preliminary mounting. Therefore, one appointment is eliminated.

Being less bulky than other devices, the BBBR is easier to use and less stressful to the patient. Based on the "ball point pen" principle, the stylus can be incrementally adjusted in the mouth when obtaining vertical. The ball bearing glides smothly over the tracing plate, leaving an accurate Gothic Arch Tracing.

Even the so-called "locked condyle" patients relax when they are made aware of the smooth rolling ball bearing pin.

Kit includes complete illustrated instruction manual.

Item# 313-100 $354.00
